Tip of the Month

Have you ever watched baseball? You probably have and before the game put you to sleep you may have noticed that the catcher makes hand signals to the pitcher on where and how he wants the pitcher to throw the ball. You can use this technique in the much more action packed sport of badminton as well!

If you and your partner come up with a list of hand signals to let the other know where they should be positioned on the court, or if they plan on hitting a long or short shot, it could significantly improve your game.
